**Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than the original cost. Visit [PacificLife.com](http://PacificLife.com) for returns as of the most recent month-end.**

These returns are based on a sample \$100,000 Pacific Choice 2 variable annuity contract allocated to the respective investment portfolio. Annualized charges deducted were 0.85% mortality and expense risk charge (contract value death benefit) and 0.25% administrative charge; \$50 contract fee waived since net contract value  $\geq$  \$50,000 on contract anniversary. Optional rider charges, if deducted, would further reduce performance. Your actual performance may vary. The inclusion date is when the investment option was first available in a Pacific Life variable product. The inception date is when the fund became available from the investment manager and may predate when the investment option was available in the Pacific Life variable product.
