Qualified contracts, including traditional IRAs, SEP-IRAs, Roth IRA, inherited IRAs, and inherited Roth IRAs, are eligible for favorable tax treatment under the Internal Revenue Code (IRC). Certain payout options and certain product features may not comply with various requirements for qualified contracts, which include required minimum distributions and substantially equal periodic payments under IRC Section 72(t). Therefore, certain product features, including the ability to exercise withdrawal features, may not be available or may have additional restrictions. The payment acceleration feature is available but will be considered a modification to the 72(t) program and may subject the series of 72(t) withdrawals to an additional 10% federal tax. In addition, certain payout options may not be available for qualified contracts.

Income from annuity payments received from Pacific Income Provider cannot be aggregated or combined with income from other IRA contracts/assets for purposes of satisfying the required minimum distributions.

Nonqualified contracts may not be subject to the various requirements for qualified contracts, but are still subject to an additional 10% federal tax for annuity payments, withdrawals, and other distributions prior to age 59½. While there are exceptions to this additional federal tax under IRC Section 72(q), certain payment options may not comply. For nonqualified contracts, an additional 3.8% federal tax may apply on net investment income.
