VARIABLE ANNUITY INVESTMENT OPTION OVERVIEW

Total Net Fund Expenses and Similarly Managed Mutual Funds as of 5/1/22

¹Net operating expenses are as of the most recent prospectus date and are subject to change. These expenses are assessed annually as a percentage of each fund's average daily net assets. Net operating expenses reflect waivers, reductions, and reimbursements. The table does not reflect expenses and charges that are, or may be, imposed under the variable annuity contract.

²Variable Annuity Illustration Date refers to the earliest date a hypothetical illustration can be run on the variable annuity portfolio. Variable annuity illustrations can be run on the Financial Professionals website at PacificLife.com.

³The money managers listed also may offer retail mutual funds. Although some funds may have names or investment goals that resemble retail mutual funds managed by the same money manager, these funds may not have the same underlying holdings as the retail mutual funds. Fees may vary between the variable annuity investment options and the similarly managed mutual funds. Investment results may be higher or lower.

⁴Fidelity® VIP FundsManager® 60%: FMR Co., Inc (FMRC) has contractually agreed to waive 0.05% of each fund's management fee. This arrangement will remain in effect through April 30, 2023. In addition, Fidelity Management & Research Company (FMR) has contractually agreed to reimburse 0.10% of class-level expenses for Service Class and Service Class 2. This arrangement will remain in effect for at least one year from the effective date of the prospectus, and will remain in effect thereafter as long as Service Class and Service Class 2 continue to be sold to unaffiliated insurance companies. If Service Class and Service Class 2 are no longer sold to unaffiliated insurance companies, FMR, in its sole discretion, may discontinue the arrangement.

⁵PLFA Pacific Dynamix® Portfolios: Net expenses reflect a contractual expense cap in place through April 30, 2023. There is no guarantee that expenses will continue to be capped after that date. Does not include contract-level charges. A fund-of-funds involves direct expenses for each fund and indirect expenses for the underlying funds.

Variable annuities are long-term investments designed for retirement. The value of the variable investment options will fluctuate so that shares, when redeemed, may be worth more or less than the original cost. Annuity withdrawals and other distributions of taxable amounts, including death benefit payouts, will be subject to ordinary income tax. For nonqualified contracts, an additional 3.8% federal tax may apply on net investment income. If withdrawals and other distributions are taken prior to age 59½, an additional 10% federal tax may apply. A withdrawal charge also may apply. Withdrawals will reduce the contract value and the value of the death benefits, and may reduce any optional benefits.
